- .NET Core, Docker, Kafka, ASP.NET Web API, Azure Services, ReactJS, Angular, Microservices and C++.

FIS, PUNE

SR. MANAGER - DEVELOPMENT

JUNE'16 – DEC'22

- Manage and develop complete workflow of project, ensuring development timeline and all necessary reviews are performed and projects are successfully released to production.
- Manage and develop solution architecture and development through the process of designing new solution and redesigning the old ones for products related to Capital Market.
- Manage, mentor, grow a team of high-performance engineers through technical ownership of products like IntelliMatch Payment Investigation and ISO20022 Reformatter.
- Worked with many clients to implement their applications to support ISO 20022 and SEPA payments.

TECHNOLOGY/TOOLS:

- .NET Core, Docker, Kafka, IBM MQ, ASP.NET Web API, Azure Services, AngularJS, Angular, Swagger (Rest API Doc), PowerShell, and Microservice.

ACADEMIC CREDENTIALS

Post-Graduate:

Master of Computer Application, 2009
Saurashtra University, Rajkot, Gujarat with **72.97%**

Graduation:

Bachelor of Commerce, 2006
Saurashtra University with **63.42%**

OPEN-SOURCE PROJECTS

NgxIsoForm

This form is used to design Angular Reactive Form using any given XSD. The primary use of this UI library is to design ISO 20022 forms dynamically.

NgxXmlMessage

This form is used to design Angular Readonly Form using any given XML/ISO 20022 messages. The primary use of this UI library is to design ISO 20022 or MX readonly forms dynamically.

Msgraph-Email

Python client library to read/send O365 or Exchange Server emails using Microsoft Graph API

NgRxEventBus

Mediator Pattern based EventBus service mechanism as Angular service using RxJs.

XSDService

This will help to convert XSD to JSON.

PERSONAL DETAILS

Date of Birth:

21st December 1985

Languages:

English, Hindi, Gujarati

- Domain knowledge of Reconciliation product like **IntelliMatch Payment Investigation and ISO20022 Reformatter** and have a good exposure to **ISO20022 and SEPA Payment Messages**.

TCS, PUNE

I.T. ANALYST

SEP'14 - JUNE'16

- Architect and develop the Web-Heat Map project using technologies like AngularJS 1.x, Grunt & bootstrap framework and ASP.NET based Web REST API.
- Developed and successfully migrate SharePoint based SSRS reporting application to ASP.NET and hosted the same on Azure Cloud.

TECHNOLOGY/TOOLS:

- Angular JS 1.x, ASP.NET MVC 4 with C#, SQL, SSRS and exposure to SSAS

ACCENTURE, PUNE

SOFTWARE ENGINEERING SR. ANALYST

APR'14 - SEP'14

- A short time span with Accenture but as a Sr. Developer, I was handling team of two and handling few Core Modules of UI.

SYMPHONY TELECA, BANGALORE

SENIOR ENGINEER

AUG'12 - APR'14

- Worked onsite (US) to understand business requirements for the public safety domain.
- Designed, Architect & Developed the Core Modules using AngularJS 1.x and .Net Frameworks.
- Played a role of Sr. developer in the Scrum team and participate in its various ceremonies

TECHNOLOGY/TOOLS:

- Angular JS 1.x, Typescript, Kendo UI, ASP.NET MVC 4 with C#, Windows Workflow, EF 5.0

IGATE, GANDHINAGAR

SOFTWARE ENGINEER

FEB'11 - JULY'12

- Developed End-to-End Mobile Web App using jQuery Mobile and MVC.Net.
- Developed the MVC 3.0 based Web API for the Mobile Web App.

SEARCH CO-SOURCING SERVICES PVT LTD, RAJKOT

IT ANALYST

JAN'09 - FEB'11

- Developed the automate modules to process freight payment tracking system using .Net Windows projects.
- Developed jQuery UI Components using jQuery and Object-Oriented JavaScript.
- Worked on Google Apps (GCP) using Python APIs to transfer data from Exchange Server to Google Apps.
